The Total Solution Contract Vehicle for Complex Professional Services Requirements

The One Acquisition Solution for Integrated Services (OASIS) contract vehicle was created based on the needs of the federal acquisition community. The result of a transparent and collaborative effort between the General Services Administration (GSA), industry partners, and customer agencies, the OASIS procurement contract is flexible and efficient. OASIS is your best-value solution to address even the most complex professional services requirements, while saving the government time and money.

OASIS Program Benefits

- Offers a single government-wide acquisition platform to support complex professional services requirements and both commercial and noncommercial professional services
- Features low contract administrative fee, especially for U.S. Air Force and Army contracts
- Offers a limited number of awardees and contract holders
- Offers on-ramp/off-ramp procedures to ensure a flexible, vibrant vendor pool
- Supports customers with a robust web library that, among other support features, will have sample documents, templates, and a platform for sharing best practices
- Enables agencies to concentrate on agency missions rather than on the acquisition itself, thus minimizing the proliferation of multiple-award, indefinite delivery/indefinite quantity contracts
- Reduces the lead time and administrative efforts for agencies to acquire complex professional services
- Allows for all contract types at the task-order level, including cost-reimbursement
- Allows for the full flexibility to add ancillary support (other direct costs) at the task-order level
- Allows labor categories to be added at the task-order level
- Standardizes labor categories and qualifications levels
- Maximizes opportunities for small businesses

Parsons: Your OASIS Prime Contractor

Parsons is a prime contractor on four OASIS contracts: Pools 1, 3, 4, and 5b. Pool 1 is associated with North American Industry Classification System (NAICS) 541990, all other Professional, Scientific, and Technical Services, along with 21 other NAICS

codes. Pool 3 is associated with NAICS Code 541330, Military and Aerospace Equipment and Military Services. Pool 4 is associated with NAICS Code 541712, Research and Development in the Physical, Engineering, and Life Sciences (except Biotechnology). Pool 5b is associated with NAICS Code 541712, Exception C, Space Vehicles and Guided Missiles, their Propulsion Units, their Propulsion Units Parts, and their Auxiliary Equipment and Parts.
